

HOW TO PLAY...

WHEELS VS DOORS

We've all thought about it haven't we? Are there more **WHEELS** or **DOORS** in the whole world? Well, now it's time to pick a side...

1 AIM OF THE GAME

To win the game all you have to do is collect **TEN WHEELS** or **DOORS** cards.

Before you play, shuffle the wheels and doors together, and place them in a face down pile in the middle of the table.

2 PICK YOUR TEAM

The game can be played as individuals, but we think playing as a pair or team is more fun. So, split into **UP TO** four teams, and give every team a set of chips, and three random face down **WHEELS** or **DOORS** cards from the stack.

3 THE DEALER

Shuffle the yellow VS cards, and turn any two over at random. You now have a **VERSUS** situation- in this example it's **2 VS 4**. Grab the top card from the question pile and read out the two categories shown at those numbers on the **BLACK** side of the card. In this instance it's... **MOVIES FEATURING THE ROCK VS CASINOS ON THE VEGAS STRIP**. Going in a clockwise direction from the dealers, teams now place their bets one at a time.

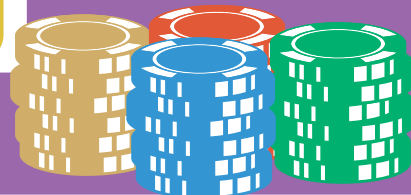

4 SELECTING A VS

Each round there is a dealer. As your team got lumbered with reading the rules, the first dealers are **YOU GUYS**.

Grab the white 'dealer' chip and place it in front of your team.

Each round the chip moves clockwise to the next team, who become the dealers for that round.

The dealing team always bets **LAST**, and they are in charge of dishing out wins and losses, handling chips and hosting the VS questions for their round. Basically, they're in charge.

5 BETTING

Each team must place their chosen number of chips onto one of the two VS cards, depending on which they think there are **MORE** of in the world. Once all bets have been placed, the dealer turns over the card to reveal the white side, and reads out the results of each of the VS categories. For example, there are more **CASINOS ON THE VEGAS STRIP** than **MOVIES FEATURING THE ROCK**.

1	UNITED STATES PRESIDENTS	46
2	MOVIES FEATURING THE ROCK	56
3	SEVEN LETTER WORDS BEGINNING WITH 'Z'	119
4	CASINOS ON THE VEGAS STRIP	60
5	PANDAS IN THE WORLD	1,864
6	MOUNTAINS OVER 8000 METERS	14

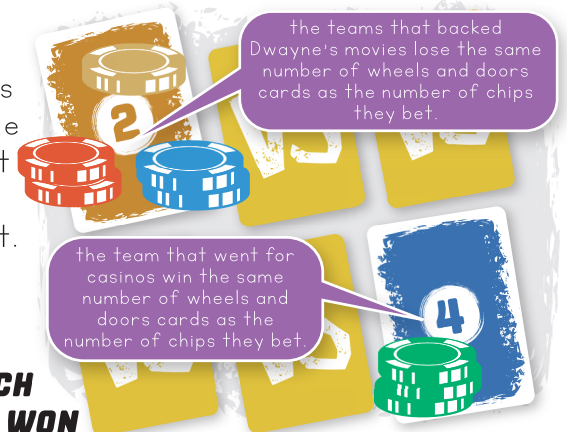

6 SCORING

Teams that guessed correctly **WIN** as many **WHEELS** or **DOORS** cards as the number of chips they bet. Teams that guessed incorrectly **LOSE** as many **WHEELS** or **DOORS** cards as they bet.

It's up to losing teams to decide **WHICH CARDS** they hand back, but any cards **WON** are dealt face down at random from the main stack. If a team end up with **ZERO** wheels or doors cards, they can still bet **THREE CHIPS** in the next round to try and get back in the game without incurring any further losses. We're nice like that.

If two teams both get **TEN WHEELS** cards or **TEN DOORS** cards at exactly the same time, the winning team will be the one with the most cards overall. If this is also a draw, then play on until one team gets to twelve **WHEELS** or **DOORS** cards.

7 ROUNDS

In each round there is a maximum number of chips that can be bet. A round ends when the **DEALER** chip has completed one full circuit of the teams.

ROUND 1

3 CHIPS PER VS

ROUND 2

4 CHIPS PER VS

ROUND 3+

5 CHIPS PER VS

*All of the stats in this game were true (according to the ol' internet) as of 2022. Apologies to The Rock if he's made loads more movies since. Found a mistake? Email us hello@format.games
